>>>>>>>> Healthcare Close to Home <<<<<<<<<

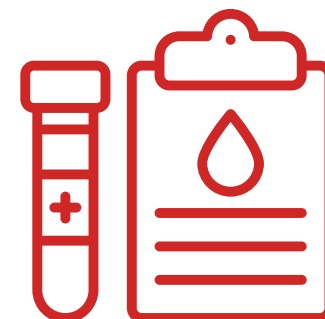

Direct Access Labs, also known as walk-in labs, provide individuals with the ability to order and receive laboratory tests without a physician's referral. These labs offer a convenient and affordable option for people to monitor their health and track changes over time.

With **Direct Access Labs**, individuals can choose from a select menu of tests with results typically available within a few days.

Direct Access Labs can benefit the uninsured, underinsured, or those with high deductible insurance plans. However, it's important to note that **Direct Access Labs** should not replace regular visits with a healthcare provider. Instead, they can be a valuable tool to supplement routine healthcare.

Patients are encouraged to share a copy of the results with their primary healthcare provider for a more comprehensive understanding of their health.

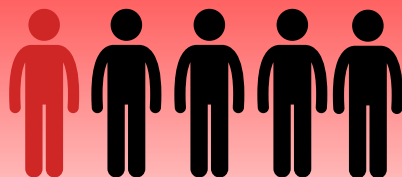

For more information, go to <https://www.rchc.us/laboratory> or call the lab department at 785-626-3211 Ext. 2705.

Skin Cancer Awareness Month

The Risk...

1 OUT OF **5**

Americans will develop skin cancer by age 70.

With over 5 million cases diagnosed in the United States each year, **skin cancer is America's most common cancer.**

It is important to see your primary care physician if you notice any changes to your skin, such as new moles or lesions, or if you have a history of skin cancer in your family. Your primary care physician can perform a skin exam, diagnose any suspicious lesions, and provide treatment or refer you to a specialist if needed. Early detection and treatment of skin cancer can greatly improve your prognosis and overall health..

Call Rawlins Clinic at 785-626-3241 to schedule an appointment.
